HunterDouglas
ALUMINIUM VENETIAN BLINDS

Product Information
STANDARD ALUMINIUM VENETIAN CORD OPERATION

The standard cord operation option allows you to raise and lower the blinds by the use of a cord.

UNIWAND

Introducing a new standard of innovation to the Aluminium Venetian Blind range is the Uniwand operating option – the first of its kind in the Australian market. The Uniwand offers a cordless operating system for the 16mm Micro and 25mm Slimline Venetian Blinds, that is the ultimate child-safe control option.

The Uniwand operating option is available in White, Cream, Silver and Black allowing for a wide range of colour co-ordination and is suitable for blinds up to 4m².

To raise or lower the blind, simply move the slider up and down.

Turn the Uniwand to tilt the slats and control the light.

Aluminium Venetian Blinds are covered by a 5 Year Warranty*.

Aluminium Venetian Blinds are the perfect window covering solution for light control, providing the opportunity to maximise natural light or have complete privacy with the simple open and close movement of the slat.

With a large range of colours, finishes and designs, Aluminium Venetians can easily be incorporated into any décor scheme.

SIZE SELECTION
3 slat sizes are available to suit most windows: 16mm Micro, 25mm Slimline and 50mm Classic.

COLOUR RANGE
With a large range of colours to choose from, there is an Aluminium Venetian Blind to suit any decor. 16mm Micro range offers 5 colours. 25mm Slimline range offers 46 colours. 50mm Classic range offers 7 colours.

FINISHES
Included in our colour range are not only solid colours, but special finishes are also available to create different looks. Finishes include matt, gloss, brushed, pearlised and perforated slats. Perforated slats are an innovative solution allowing you to choose the shade solution suitable for different facade orientations (eg. 8% on south facade, 4% on east, north and west facades). These perforation options provide the ideal solution for optimal daylight regulation.

COLOUR CO-ORDINATION
The Slat has been colour co-ordinated to the headrail, bottomrail and components for a completely consistent look.

ENERGY BENEFITS
Aluminium Venetian Blinds are effective reflectors of heat – particularly in light and metallic colours – meaning less heat emanating from the windows so there is less need for cooling.

* All Hunter Douglas products that are installed correctly will comply with the Trade Practices (Consumer Product Safety Standard - Corded Internal Window Coverings) Amendment Regulations 2010 (No. 1).

ALUMINIUM VENETIAN SYSTEMS OPERATING OPTIONS

STANDARD

The standard range of Aluminium Venetian Blinds are available in a range of modern designs and finishes and in a variety of slat widths including 16mm, 25mm and 50mm.

DUO-FLEX®

Combines modern design with maximum control of light levels. These blinds group slats enabling the user to adjust the various sections of the blind in different ways. This provides the ultimate in flexibility and comfort control.

TWI-NIGHTER®

Designed to eliminate light filtering through slats when closed. The positioning of rout holes and closure of the slats provides minimal exposure of incoming light offering greater privacy and light control.

BETWEEN GLASS

Designed to fit between glass panels of a double glazed window. Provides superior energy efficiency and can be adjusted with a tilt control knob or remote control. Also available with an internal or external cord raise for maintenance purposes.

LIMITED EDITION

Offers a functional, durable blind, that has been designed with reduced slat overlap to minimise the quantity of slats within the blind and as a result is a more economical alternative. This is also offered with clear end caps and components. This blind has been designed as a limited feature model and does not have a clutch, wand or tilt limiter.

WARRANTY

ALVB blinds are covered by a 5 Year Warranty*.
**HEADRAIL**

The 16mm Micro and 25mm Slimline Aluminium Venetian Blinds use a 26mm wide x 26mm deep pre-coated 0.5mm aluminium zinc alloy coated steel headrail. Finished in a Thermosetting Polyester Coating over a chromated primer, the headrail has added strength and rigidity.

**STRING TAPE**

Woven to strict specification allowing more slat overlap for ultimate light control.

**BOTTOMRAIL**

The 16mm Micro and 25mm Slimline Aluminium Venetian Blinds use a D-shaped, 22.5mm x 10mm lock-seamed tubular bottomrail. Roll formed from 0.5mm aluminium zinc alloy coated steel, the bottomrail is finished in a Thermosetting Polyester Coating over a chromated primer. This fully enclosed bottomrail adds weight and maximum strength for rigidity. The coating process meets Coil Coating Standards (AS/NZS2728:2007) to ensure paint adhesion flexibility and resistance to solvents. The coil has been stove enamelled for even greater corrosion resistance.

**COLOUR OPTIONS**

### 16mm MICRO

- **Clean Brilliant White**
  - 26.058.104
- **Warm Pure Silk**
  - 26.058.712
- **Onyx**
  - 26.058.442

### Cleaning Guide

**Caring for your Aluminium Venetian Blinds is simple.** Close the slats and then dust them with a feather duster, soft-haired brush or soft cloth. If the stains are stubborn, it is best to clean them with a damp cloth. You can also use a vacuum cleaner at the lowest setting.
