Maintenance and Cleaning Instructions

The shutters require little maintenance.

NON-MOTORISED Shutters

The surfaces of the shutters will collect a layer of surface dust over time. Normal dusting with a damp soft cloth will remove this accumulation.

If more thorough cleaning is required, then the following procedures should be followed:

- Washing with mild soap and water or a mild household dishwashing liquid, using a soft cloth, generally will be sufficient.
- Mild, water-based, household cleaners can be used on dirt and stains which are more difficult to remove.
- External shutters should be hosed down regularly and washed with a mild soap solution to remove salt and air pollutants. Shutter hardware should be sprayed regularly with a silicon spray.

MOTORISED Shutters

The surfaces of the shutters will collect a layer of surface dust over time. Normal dusting with a damp soft cloth will remove this accumulation.

DO NOT hose down motorised shutters with running water.

DO NOT allow soap, water or liquid cleaning solutions to come into contact with the motor or battery wand.

If more thorough cleaning is required, then the following procedures should be followed:

- Washing with mild soap and water or a mild household dishwashing liquid, using a soft cloth, generally will be sufficient to clean the LOUVRES and FRAME.
- Mild, water-based, household cleaners can be used on dirt and stains which are more difficult to remove from the LOUVRES and FRAME.
- The COVER protecting the battery wand (which is located in a cavity) may be wiped with a damp soft cloth.

CAUTION

Never use harsh abrasives, chlorine-based cleaners and cleaners containing organic solvents on the shutters as they may affect the surface appearance and durability.
